Every TeamKeeper site comes with standard reports available to users with Administrator, AdManager or Reporter roles. If custom reports are purchased, they will be available beneath the list of standard reports.

## Assigning the Reporter Role

The standard reports can be accessed only through the Administrator, AdManager or Reporter role. To add the reporter role to a user, go to Employee Management and select the user by opening their group or the View All group. Under the “Roles” tab, click Reporter and “Save” at the bottom.

The user will have to log out and log back in for the change to take place. Once the role is assigned, the user will have the Administrator menu but only the Reporter link.

If a user is assigned as a reporter over a specific group, the user will only be able to view timesheet data based on that group. If the user is not assigned, they will have access to all groups when filtering for the reports.

## Administrator Reports

Standard reports are preloaded to the site and cover several categories of timesheet data. Custom reports are available – their fee is based on desired output format and complexity. Some reports are only available with the purchase of additional modules.
