

Release Notes: Version 8.0

Release Date: 11/27/2022

## New Security Features

- All support for TLS 1.3
- All support for HTTP Strict Transport Security (HSTS)
- Robust Forward Secrecy
- Supports Secure Renegotiation
- All support for ClickJack protection
- Capability to restrict simultaneous logins for users
- 'A' rating on SSL configuration as reported by SSL Labs
- Improved rainbow table attack mitigation
- Updated application server and libraries to mitigate the latest threats

## Bug Fixes

- The Missing Pay Stub Report no longer includes the Administrator user account in the results.
- Newly created Clients are now properly populating in the right Client list pane from the Client Management page.
- Users no longer receive a Java-related error message when submitting a leave request on the mobile app.
- The issue with the Reset Password button not responding for the Forgot Password feature is now resolved.
- The *More than one Leave Variable Class* application error received from importing .csv leave files is now resolved.
